Re: Request for extension of comment periods: Trichloroethylene; Regulation of Vapor Degreasing Under TSCA § 6(a) (docket ID EPA-HQ-OPPT-2016-0387) and Methylene Chloride and N-Methylpyrrolidone; Regulation of Certain Uses Under TSCA § 6(a) (docket ID EPA-HQ-OPPT-2016-0231)

Dear Dr. McPartland and Dr. Denison:

Thank you for your letter of April 5, 2017, to the U.S. Environmental Protection Agency requesting that the Agency not extend the comment periods for the proposed rules on the use of trichloroethylene in vapor degreasing (RIN 2070-AK11) and uses of methylene chloride and N-methylpyrrolidone in paint and coating removal (RIN 2070-AK07) by 120 days to August 17, 2017, as other commenters have requested.

We appreciate your participation in the comment process, and recognize your request to maintain the current comment periods. However, in the interest of receiving comprehensive public comments for the benefit of the current rules, we have decided to extend the comment periods for 30 days, until May 19, 2017. The Agency believes this extension of 30 days beyond the current comment periods of 90 days will not create delays in subsequent administrative steps related to either the current or future rule proposals and will be sufficient for receiving additional comments.

Any questions regarding this response should be directed to Joel Wolf at (202) 564-0432.

Sincerely,

A handwritten signature in black ink, which appears to read "Wendy Cleland-Hamnett", is written over a horizontal line.

Wendy Cleland-Hamnett  
Acting Assistant Administrator
